**MODIFIED STUDY PLAN OF MASTER OF  
HEALTH ADMINISTRATION PROGRAM**

---

**COLLEGE AT A GLANCE:**

---

**Introduction:**

The Master of Healthcare Administration (MHA) program main objective is to qualify students for a wide variety of leadership roles in the health care sector. However, the program includes leadership, cognitive skills and analytical capabilities, a global perspective and administrative tools necessary for the effective and efficient leadership and management of health care institutions in both the public and private sectors. Students also gain the ability to understand the policies, laws, problems and issues facing the health care sector with a focus on the areas of quality assurance, risk management and insurance health care laws and regulations, ethics and other best methods of modern practices that have an important role in managing the health care environment. When preparing the program, it was taken into consideration to rehabilitate the categories of health practitioners to work in the field of health care management, which qualifies them when the conditions of the Ministry of Civil Service and the Saudi Commission for Health Specialties are applied to obtain an additional degree in the career ladder or a higher professional degree.

**History:**

The College of Health Sciences was established in 1432H; among two other colleges in the Saudi Electronic University (SEU); by Royal Decree number 37409/B which was issued by King Abdullah Bin Abdulaziz, the custodian of the Two Holy Mosques, on 10/8/2011 to launch the Saudi Electronic University (SEU). The college of health sciences is the only specialized governmental college that utilize the Blended model of Electronic learning in the Kingdom of Saudi Arabia. The college of health sciences includes the Department of Health Informatics and the Department of Public Health; there are ten branches for the SEU in the kingdom of Saudi Arabia; two of them have started the Program Master of Healthcare Administration in 2015 at the Saudi Electronic University; Riyadh and Dammam branch started accepting students from the year 1437 H.

---

**Mission:**

Our mission is to provide high quality academic programs that are delivered towards utilizing high technology, through the blended learning model, to graduate competent and highly qualified health professionals to meet national and international standards and serve the requirements of health care sector in Saudi Arabia.

**Vision:**

A pioneer academic institute that excels regionally and internationally by utilizing advanced learning methods to integrate Healthcare Administration technology with public health concepts.

**Values:**

Stemming from our religious and cultural identity:

1. **Honesty and Allegiance:** We strongly advocate Islamic values and professional ethics such as honesty, integrity, professionalism and loyalty.
2. **Human Health Awareness:** The drive to build awareness of priority health issues and current challenges in Saudi Arabia and instil the motivation to improve health services and raise health awareness in the community.
3. **Continual Learning:** Supporting the continual growth of students' knowledge base; viewing them as future health care professionals, encouraging them to develop their skills, confidence and research capabilities.
4. **Teamwork and Communication:** To instil the principles of teamwork, active citizenship, community and belonging where effective and efficient cooperation contributes to achievement goals and accomplishment of tasks.

**Objectives:**

Through its departments and academic curricula, the college seeks to achieve the following:

1. Raising the competence levels of our students to keep pace with the developments of various health sectors in the Kingdom.
2. Developing the spirit of belonging and proficiency.
3. Fulfilling the needs of our society by producing highly qualified national health cadres.

- 
4. Raising health awareness in the community.
  5. Providing appropriate educational environment for students and faculty members
  6. Offering training and workshops to develop the skills of health staff
  7. Presenting consultations to develop and support the health system.
  8. Integrating e-learning and blended learning with the field of health informatics and public health.
  9. Promoting excellence in research through interdisciplinary research involving various health specialties and sectors.

#### **A. PROGRAM IDENTIFICATION AND GENERAL INFORMATION**

##### **1. Program title:**

- Degree Name: Master of Healthcare Administration

##### **2. Total credit hours needed for completion of the program:**

- 36 credit hours

##### **3. Award granted on completion of the program:**

- Master Degree in Healthcare Administration

##### **4. Major tracks/pathways or specializations within the program:**

- Healthcare Administration

##### **5. Professional occupations:**

**Our Postgraduates can work or contribute to one of the following sectors:**

- Hospital and health management
- Health care information systems.
- Research and consultation
- Health care strategic planning
- Health insurance
- Residential care
- Public health
- Teaching and training
- National and intentional organization

##### **6. Name of program coordinator or chair: Dr. Ahmad Alkhalifah**

---

E-mail [A.ALKHALIFA@seu.edu.sa](mailto:A.ALKHALIFA@seu.edu.sa)

---

## **B. PROGRAM CONTEXT:**

### **1. Rationales of the program:**

The master in healthcare administration degree program prepares students for a wide variety of executive positions in health organizations. The design of the curriculum reflects the program's conviction that today's health care administrator needs both a comprehensive understanding of the issues involved in patient-centred service organizations and strong business skills. Students become familiar with the social, political, economic, and financial environments of health care organizations. The concepts, tools, and techniques of effective managerial decision making, planning and control also are introduced. The Master of Healthcare Administration (MHA) is a master's-level professional degree granted to students who complete a course of study in the knowledge and competencies needed for careers in healthcare administration, involving the management of hospitals and other health services organizations, as well as public health infrastructure and consulting. This master degree program designed to give graduates of health disciplines (in particular) greater understanding of management issues and prepare them for senior management roles in various healthcare organizations.

### **2. Relevance of the program to the mission and goals of the institution:**

The mission and goals of Saudi Electronic University on Master in Healthcare Administration program is to prepare healthcare managers who are transformational leaders in guiding healthcare's future in their chosen career path. To do this, students demonstrate a high level of professional competence, community service awareness, servant leadership, and personal attributes needed in an evolutionary healthcare environment. Competency development is determined at the interface between acquisition and application of knowledge, skills and attitudes, so SEU and the Colorado State University Global Campus partnership of delivering MHA provides high quality educational standards and international practices of healthcare administration in order to represent the nation and compete with international universities in healthcare administration and offer MHA through the best applications and technologies of e-learning.

**3. Relationship to other programs:****a. Courses required from other programs:**

- None

**b. Courses provided to other programs:**

- None

**C. MISSION, GOALS AND OBJECTIVES:****1. Program Mission:**

The mission of the program is to enhance the knowledge and skills of students who are having bachelors in health related field and prepare them to offer the best quality of healthcare in KSA and be specialized in healthcare field and educate them on how to improve the quality of healthcare through various new technologies and understanding of different health systems around the world

**2. Program goals:**

The goal of the program is to:

1. Develop and incorporates leadership skills in students.
2. Develop knowledge in students regarding various management administrative activities.
3. Develop understanding and awareness of the policies, laws, politics, problems, and issues facing the healthcare industry.
4. Deliver knowledge of current best practices important to managing within a healthcare environment.
5. Prepares students for a wide variety of leadership roles within the healthcare industry.

**3. Program Objectives:**

The objectives of the program can be summarized as follows:

1. Acquire the knowledge and skills needed to identify and solve healthcare organizational problems using a systematic decision making approach.
2. Demonstrate the skills needed to manage, develop, and motivate organizations to meet changing organizational needs in a healthcare environment

- 
3. Conduct a critical analysis of problems, research, solution alternatives, and the environment in the development and execution of a strategy as it relates to the healthcare enterprise
  4. Develop awareness of the policies, procedures, laws, and ethics of the diverse array of healthcare alternatives.
  5. Apply business administration and management knowledge to the healthcare industry within the domains of management, organizational leadership, quantitative reasoning for business, accounting, applied business research, operations management, finance, marketing, and strategic planning & implementation.
  6. Synthesize the value of personal and professional development, community service, and life-long learning.

#### **4. Program learning outcomes**

*At the end of studying this program the graduate students will be able to:*

1. Assess the structure and design of effective healthcare organizations and the role of management in promoting healthcare systems and financial resources needed for improving the health insurance systems.
2. Determine key challenges for healthcare settings with regard to the development of healthcare law and policy, healthcare economics, and different processes of quality improvement
3. Demonstrate the ability to use different statistical tools in interpretation the results of different research in public health administration field and how to use software applications to improve healthcare information system
4. Differentiate various problems arising in the healthcare field and quality of healthcare which needed for improving performance of healthcare systems
5. Analyze economic implications of expenditure and the application of basic financial management in different healthcare organizations
6. Evaluate ethical and legal issues relevant to the policies, practices, and management of healthcare delivery within the different healthcare organizations

## D. PROGRAM STRUCTURE AND ORGANIZATION

### 1- Program Structure

Course Code	Course Title	Prerequisite	Credit Hours
Core Courses			
HCM500	Healthcare Systems		3
HCM502	Organizational Behavior and Human Resources in Healthcare		3
HCM505	Research Methodology in health management		3
HCM506	Applied Biostatistics in Healthcare Administration	HCM505	3
HCM515	Health Law and Ethics	HCM500	3
HCM 563	Healthcare Insurance		3
HCM520	Quality and Patient Safety	HCM 500	3
HCM550	Healthcare Policy Analysis and Development	HCM 500	3
HCM565	Healthcare Finance		3
HCM570	Healthcare Information Systems	HCM 500	3
HCM600	Research Project	HCM505	3
Elective Courses			
HCM501	Healthcare Administration		3
HCM564	Healthcare Economics	HCM 500	
HCM 574	Public Health		
Internship			
HCM599	8 Weeks training period in Hospitals		
Total			36

### 2 - Program Structure by Semesters

Course Code	Course Title	Prerequisite	Credit Hours
<b>Core Courses</b>			
<b>Semester 1</b>			
HCM500	Healthcare Systems		3
HCM502	Organizational Behavior and Human Resources in Healthcare		3
HCM505	Research Methodology in health management		3
Total			9
<b>Semester 2</b>			
HCM506	Applied Biostatistics in Healthcare Administration	HCM 505	3
HCM515	Health Law and Ethics	HCM 500	3
HCM 563	Healthcare Insurance		3
Total			9
<b>Semester 3</b>			
HCM520	Quality and Patient Safety	HCM 500	3
HCM550	Healthcare Policy Analysis and Development	HCM 500	3
HCM565	Healthcare Finance		3
Total			9

Semester 4			
HCM570	Healthcare Information Systems	HCM 500	3
Elective Course	HCM501 OR HCM574 OR HCM564		3
HCM600	Research Project	HCM505, HCM506, and 15 credits hours	3
Total			9
<b>Internship</b>			
HCM 599	8 Weeks training period in Healthcare Organizations and related fields		
<b>Elective Courses</b>			
<b>The student should choose one from the following three courses</b>			
Course Code	Course Title	Prerequisite	Semester
HCM501	Healthcare Administration		Semester 1
HCM574	Public Health		Semester 2
HCM564	Healthcare Economics	HCM 500	Semester 3
<b>Program Total Credit Hours</b>			<b>36</b>

### 3. Attendance and Completion Requirements:

- Students must attend all face to face and live session virtual classes.

### 5. Duration of the study:-

- The duration of the study is 6 semesters.
- The semester is composed of series of modules.
- The curriculum based on credit hours' system, where MSc weight 42 credit hours

### 6. Students Assessment System:

#### According to SEU examinations guidelines and regulations

- Continuous evaluation
- Midterm and final exams
- The general exam frame should include:
  - Written Examination ranging according to the curriculum phase and type of module:
  - Multiple –choice questions
  - Problem solving questions
  - Structured Short Notes

**The examination results should be graded and assessed as following, According to SEU examinations guidelines and regulations**

Degree		Percentage %
Excellent	A+	95% -100%
	A	90 % -94.9%
Very good	B+	85 - 89.9 %
	B	80 – 84.9%
Good	C+	75 - 79.9 %
	F	70 – 74.9%
Failure	F	Below 70 %

#### **4. LEARNING FACILITIES AND EQUIPMENT:**

##### **1. Facilities required**

- a. Classrooms
- b. Free Internet
- c. Computer Laboratories
- d. Digital Library

##### **2. Classrooms**

- a. E-Podium
- b. Smart Boards
- c. White Boards
- d. Projectors

##### **3. Equipment (including IT)**

- a. Computers.
- b. Laptops
- c. Headphones

# Course Descriptions

**Healthcare systems (HCM 500)**

<b>College</b>	Health Sciences		<b>Department</b>	Public Health
<b>Course Name</b>	Healthcare Systems	<b>Course Code:</b>	HCM500	
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours	
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
<b>Course Level</b>	Level 1	<b>Prerequisite</b>	None	
<b>Course Description:</b> This course provides a broad overview of healthcare system organization from both a micro and macro level. An introduction to the definitions, concepts related to various systems, and contemporary trends and challenges in healthcare delivery are considered. The course will examine the historical evolution and current state of health care systems in the USA, Canada, the EU, and Asia. Areas of study include the introduction to the various forms of provider models and service delivery systems found in private and public health sectors				
<b>Course learning outcomes:</b> <ol style="list-style-type: none"> <li>1. Describe global health system regulations with current global challenges and opportunities in ensuring access to healthcare</li> <li>2. Define the key constructs related to the concepts of health, health system, global health, diseases and its etiology.</li> <li>3. Analyze the healthcare systems of Saudi Arabia, UK , Germany, USA, Egypt, Turkey, and Jordan</li> <li>4. Analyze the variables of cost, access, quality, and economic assumptions of healthcare systems.</li> <li>5. Evaluate delivering care methods as Medical &amp; Information Technology and managing utilization of these methods.</li> </ol>				
<b>Major Course Topics:</b>				
1. Academic Writing – Getting Started				
2. Research, Evaluate, Cite, and Write				
3. Defining Health Systems, Global Health, and Disease				
4. Global Health System Regulations				
5. Access to Care				
6. Financing Health Systems				
7. Delivering Care: Medical and Information Technology				
8. Managing Utilization, Controlling Costs, and Other Challenges				
9. Healthcare System of Saudi Arabia				

10. Healthcare System of the United Kingdom					
11. Healthcare System of Germany					
12. Healthcare System of the United States of America					
13. Healthcare Systems of Egypt, Turkey, and Jordan					
14. Comparative Perspectives: International and Saudi Healthcare					
<b>Grading:</b>	<input checked="" type="checkbox"/> Mid-Term Exams		<input checked="" type="checkbox"/> Quizzes		<input checked="" type="checkbox"/> Assignments
	<input checked="" type="checkbox"/> Final Exam		<input checked="" type="checkbox"/> Project		<input type="checkbox"/> Lab Work

### Healthcare Administration (HCM 501)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health
<b>Course Name</b>	Healthcare administration	<b>Course Code:</b>	HCM501	
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours	
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
<b>Course Level</b>	Level 1	<b>Prerequisite</b>	None	

#### Course Description:

This course provides a foundation in Health care Administration. It will give an introduction to the principles of management and leadership as the foundations for the administration of health care products and service delivery. The evolution of management principles and practices are traced and the bases for health care administration are analyzed. The course will emphasis on the management of global health care systems in technological societies and the need for innovation and creativity in health care administration. The student will learn the roles of a manager in healthcare organizations, models and styles of leadership, theories of motivation and motivational strategies, strategic planning, outcome monitoring and control, healthcare marketing, quality improvement basics, financing healthcare, managing healthcare professionals and human resources, team work, and fraud and abuse of the healthcare system.

#### Course learning outcomes:

1. Describe the leadership abilities and groups & team building skills in healthcare administration
2. Recognize the different approaches and management which transforming the healthcare administration landscape in Saudi Arabia
3. Illustrate the role of effective communication practices and key functions of human resources in healthcare administration
4. Explain various problem arising in healthcare field related to change, innovation, marketing and consumerism in Saudi Arabia
5. Evaluate strategic assessment & planning and its effectiveness & efficiency in Saudi Arabian healthcare organizations

#### Major Course Topics:

1. Essential Components of the Healthcare Industry in Saudi Arabia
2. Healthcare Organization Structures in Saudi Arabia
3. Healthcare Organization Departments, Groups & Teams
4. Corporate Culture in Saudi Arabia
5. Corporate and Regulatory Internal Compliance for Facilities
6. Leadership & Management
7. Marketing & Consumerism in Saudi Arabia
8. Human Resources
9. Strategic Assessment and Planning in Saudi Arabia

College of Health Sciences

10. Productivity, Prioritization and Problem Solving in Saudi Arabia					
11. Goal Setting, Clarity and Communication in Saudi Arabian Healthcare Organizations					
12. Change, Motivation and Innovation					
13. Effectiveness and Efficiency in Saudi Arabian Healthcare Organizations					
14. Managing the Evolution of Healthcare in Saudi Arabia					
<b>Grading:</b>	<input checked="" type="checkbox"/> <b>Mid-Term Exams</b>		<input checked="" type="checkbox"/> <b>Quizzes</b>		<input checked="" type="checkbox"/> <b>Assignments</b>
	<input checked="" type="checkbox"/> <b>Final Exam</b>		<input checked="" type="checkbox"/> <b>Project</b>		<input type="checkbox"/> <b>Lab Work</b>
<b>Text Book:</b>	Olden, P. (2019) Principles of Healthcare Administration (3ed Edition) Health Administration Press. ISBN: 9781640550438

### Organizational Behavior and Human Resources in Healthcare (HCM 502)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health							
<b>Course Name</b>	Organizational Behavior and Human Resources in Healthcare	<b>Course Code:</b>	HCM502								
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours								
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English								
<b>Course Level</b>	Level 1	<b>Prerequisite</b>	None								
<b>Course Description:</b> This course focuses on the application of theory to develop the knowledge and skills needed to effectively manage individuals and groups in health care organizations. Topics include human behavior, human resource management and labor relation policies. This course serves as an introduction to organizational behavior and human resource management in healthcare, examining organizational theory, change, and leadership. Students will learn the processes and practices involved in these areas: management of individuals and teams, change and conflict management, human resource strategy, human resources and workforce management, training and development, performance appraisals, compensation, retention, and human resource systems effectiveness.											
<b>Course learning outcomes:</b> <ol style="list-style-type: none"> <li>1. Describe theories and practices of management that help in identifying conflict &amp; change management, organizational culture and dynamics</li> <li>2. Recognize key challenges for healthcare settings with regard to organizational improvement, development, and leadership.</li> <li>3. Assess performance management system implementation and its effect on quality of healthcare</li> <li>4. Analyze the role of developing &amp; training employees and how maximizing human resources skills in order to promote organizational effectiveness</li> <li>5. Evaluate the applications, risks, and benefits of performance management systems in healthcare organizations.</li> </ol>											
<b>Major Course Topics:</b> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr><td>1. Introduction to Organizational Behaviour and Human Resources</td></tr> <tr><td>2. Organizational Theory and Performance Management</td></tr> <tr><td>3. Leadership: Theory and Practice</td></tr> <tr><td>4. Managing Healthcare Teams</td></tr> <tr><td>5. Defining and Measuring Performance</td></tr> <tr><td>6. Change and Conflict Management</td></tr> <tr><td>7. Appraisals for Performance Management</td></tr> </table>					1. Introduction to Organizational Behaviour and Human Resources	2. Organizational Theory and Performance Management	3. Leadership: Theory and Practice	4. Managing Healthcare Teams	5. Defining and Measuring Performance	6. Change and Conflict Management	7. Appraisals for Performance Management
1. Introduction to Organizational Behaviour and Human Resources											
2. Organizational Theory and Performance Management											
3. Leadership: Theory and Practice											
4. Managing Healthcare Teams											
5. Defining and Measuring Performance											
6. Change and Conflict Management											
7. Appraisals for Performance Management											

8. Coaching for Performance Management 9. Rewarding through Performance Management 10. Effective Communication for Performance Management 11. Performance Management System Implementation 12. Developing and Training Employees and Maximizing Human Resources 13. Performance Management and Strategy 14. Internal and External Environments and Strategic Healthcare Human Resources

The live classes are delivered via Blackboard Collaboration.</b> 4. Other learning material such as computer-based programs/CD, professional standards or regulations and software.				

### Research Methodology in health management (HCM 505)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health
<b>Course Name</b>	<b>Research Methodology in health management</b>	<b>Course Code:</b>	<b>HCM - 505</b>	
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours	
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
<b>Course Level</b>	Level 1	<b>Prerequisite</b>	None	

**Course Description:**

This course will provide the students with the basics of research and a broad introduction to the methodological foundations and tools to make research. The course covers the basics of research methodology for graduate level students and introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative, and mixed methods approaches. Participants will use theoretical aspects to begin to critically review literature relevant to their field of interests. Students will learn how to identify problems to study, develop hypotheses and research questions, specify independent and dependent variables, check for the validity and reliability of studies and design research projects. They will be exposed to a broad range of designs used in their researches from laboratory and field experiments, surveys, content analysis, focus groups and in-depth interviewing

**Course learning outcomes:**

1. Describe the use of statistical software and other tools in data analysis for contrast, compare methods of collecting and analyzing data.
2. Define the research process and its importance to furthering knowledge in the field of healthcare management.
3. Explain the range of qualitative, quantitative, and mixed methods research methodologies available, including their strengths and limitations.
4. Illustrate a research proposal addressing a healthcare problem.
5. Evaluate ethical research practices and principles in healthcare research.

**Major Course Topics:**

1. Introduction to Healthcare Research
2. Planning and Preparing for Research
3. Reviewing Literature and Proper Citation
4. Quantitative Study Approaches: Observational Studies
5. Experimental Studies and Correlational Studies
6. Qualitative and Mixed Methods Research Methodologies
7. Ethical Considerations
8. Designing the Study
9. Collecting Primary Data
10. Secondary and Tertiary Data
11. Managing and Analyzing Data

12. Software and Other Tools Used in Healthcare Research					
13. Article Structure					
14. Disseminating Research					
<b>Grading:</b>	<input checked="" type="checkbox"/> <b>Mid-Term Exams</b>		<input checked="" type="checkbox"/> <b>Quizzes</b>		<input checked="" type="checkbox"/> <b>Assignments</b>
	<input checked="" type="checkbox"/> <b>Final Exam</b>		<input checked="" type="checkbox"/> <b>Project</b>		<input type="checkbox"/> <b>Lab Work</b>

### Applied Biostatistics in Healthcare Administration (HCM 506)

College	Health Sciences		Department	Public Health
Course Name	Applied Biostatics in Healthcare Administration	Course Code:	HCM506	
Credit Hours	3 credit Hours	Contact Hours	3 hours	
Teaching Language	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
Course Level	Level 2	Prerequisite	HCM505	

#### Course Description:

This course provides an introduction to important topics in biostatistical concepts and reasoning. It also represents an introduction to basic concepts covering study designs and sample size computation. Students will be introduced how to apply basic theoretical concepts of biostatistics in health science, epidemiology, and public health. Knowledge about measurement scales, types of variables and data along with various statistical methods for summarizing and presenting different types of data will be provided. The concept of probability with its applications in epidemiology and public health will be introduced. The course concludes with a moderate level presentation of important probability distributions applied commonly in epidemiology and public health. The whole program will be delivered in an application oriented way by giving more weightage for problem solving.

#### Course learning outcomes:

1. Write data from a population sample and create reports for use in healthcare administration.
2. Define the concepts and frameworks and different research methods used in biostatistics related to healthcare administration
3. Explain the role of biostatistics in assessing the development, progression of various problem, risk factors among population, different methods of data visualization
4. Evaluate data and draw appropriate inferences by applying a variety of analytical tools.

#### Major Course Topics:

1. Introduction to Biostatistics
2. Study Designs
3. Quantifying the Prevalence and Incidence of Disease
4. Summarizing Data Collected in a Defined Population Sample
5. The Role of Probability
6. Confidence Interval Estimates
7. Hypothesis Testing Procedures
8. Power and Sample Size Determination
9. Multivariable Methods
10. Nonparametric Tests

11. Distribution-Free Methods					
12. Survival Analysis					
13. Survival Analysis with R Statistics					
14. Data Visualization					
<b>Grading:</b>	<input checked="" type="checkbox"/> <b>Mid-Term Exams</b>		<input checked="" type="checkbox"/> <b>Quizzes</b>		<input checked="" type="checkbox"/> <b>Assignments</b>
	<input checked="" type="checkbox"/> <b>Final Exam</b>		<input checked="" type="checkbox"/> <b>Project</b>		<input type="checkbox"/> <b>Lab Work</b>
<b>Text Book:</b>	-Sullivan, L. M. (2018) Essentials of Biostatistics in Public Health. Jones & Bartlett Learning (3ed ed). ISBN: 9781284108194 - Dalgaard, P. (2008) Introductory Statistics with R. Springer (2ed ed). ISBN: 9780387790534

### Health Law and Ethics (HCM 515)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health														
<b>Course Name</b>	Health Law And Ethics	<b>Course Code:</b>	HCM 515															
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours															
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English															
<b>Course Level</b>	Level 2	<b>Prerequisite</b>	HCM 500															
<b>Course Description:</b> This course explores the legal and ethical challenges inherent in the administration of healthcare services. Topics include governmental regulation of healthcare false claims, fraud and abuse, antitrust compliance and litigation, informed consent, principals and legal basis for hospital governance and healthcare malpractice insurance.																		
<b>Course learning outcomes:</b>  1. Describe the structure and development of health law and ethics. 2. Recognize the impacts of legal and regulatory environments on healthcare organizations. 3. Compare basic ethical theories and perspectives. 4. Analyze various health laws and standards that affect health care administrators and managers. 5. Evaluate ethical principles in the solution of a personal leadership and organizational dilemma or challenge.																		
<b>Major Course Topics:</b> <table border="1" style="width: 100%;"> <tr><td>1. Influence of Ethical Principles on Health Law</td></tr> <tr><td>2. Structure and Development of Health Law</td></tr> <tr><td>3. Governance Structures and Internal Regulation</td></tr> <tr><td>4. Healthcare Organizations</td></tr> <tr><td>5. Governmental Regulation in Public Healthcare</td></tr> <tr><td>6. Private Healthcare</td></tr> <tr><td>7. Standards and Regulations for Healthcare Administrators</td></tr> <tr><td>8. Fraud and Abuse</td></tr> <tr><td>9. Ethical Implications of Medical Privacy</td></tr> <tr><td>10. Legal and Ethical Obligations to Provide Care</td></tr> <tr><td>11. Tort Law and Medical Malpractice</td></tr> <tr><td>12. Informed Consent and Research</td></tr> <tr><td>13. Legal and Ethical Challenges of Cost Containment and Healthcare Reform</td></tr> <tr><td>14. ### Quality and Patient Safety (HCM 520)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health											
<b>Course Name</b>	<b>Quality and Patient Safety</b>	<b>Course Code:</b>	HCM520												
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours												
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English												
<b>Course Level</b>	Level 3	<b>Prerequisite</b>	HCM 500												
<b>Course Description:</b> This course is an in-depth examination of the relationships between healthcare quality and organizational performance. Students are introduced to quality improvement and patient safety theories, models, methods and tools that have an application on addressing the challenge of improving the quality and safety of the healthcare system.															
<b>Course learning outcomes:</b> 1. Describe major principles and concepts used in defining and measuring quality. 2. Define quality improvement, risk management, patient safety initiatives conducted at varied environmental and structural levels within healthcare systems. 3. Illustrating statistical methods and tools used in quality measurement and improvement, including usage of flowcharts, cause-effect diagrams, pareto charts, run charts, etc. 4. Analyze foundational theories, accreditation standards, principles and processes of quality improvement and patient safety as they relate to healthcare and regulatory requirements. 5. Evaluate quality improvement models and methodologies to address various challenges in healthcare with emphasis on improving quality of healthcare and patient safety.															
<b>Major Course Topics:</b> <table border="1" style="width: 100%;"> <tr><td>1. Healthcare Quality and the Patient</td></tr> <tr><td>2. ### Healthcare Policy Analysis and Development (HCM 550)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health
<b>Course Name</b>	Healthcare Policy Analysis and Development	<b>Course Code:</b>	HCM550	
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours	
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
<b>Course Level</b>	Level 3	<b>Prerequisite</b>	HCM 500	

**Course Description:**

This course introduces and examines methods for assuring quality in policy, process, and outcome management, as well as the significance and statistical application of measuring outcomes. The healthcare policies and changing trends are identified and analyzed.

**Course learning outcomes:**

1. Define the important concepts, theories, laws, literature that impact public opinion and policy within the healthcare environment.
2. Outline the health policy process at both the state and national levels in areas associated with research, funding, and delivery.
3. Analyze the healthcare policy and politics in the United States, Canada, and the European Union.
4. Evaluate the political dimensions of an area of national healthcare policy and project its impact over the next five years.

**Major Course Topics:**

1. Understanding Global Health Policy
2. Contemporary Global Health Governance: Origins, Functions and Challenges
3. Measuring the World's Health
4. Kingdom of Saudi Arabia Health Policy
5. Politics of Global Health Policy
6. Ethical Reflections and Economic Perspectives
7. Policy Responses to Neglected Diseases and Essential Health Commodities
8. Social Determinants of Health
9. Pros and Cons of Securitizing Global Health
10. The Changing Humanitarian Sector
11. Understanding Vision 2030, Global Financing, and Social Determinants of Health
12. Health Systems and Delivery in the Kingdom of Saudi Arabia
13. Global Health Partnerships
14. Future Trends in KSA Healthcare in contrast with Globalization Efforts

<b>Grading:</b>	<input checked="" type="checkbox"/> <b>Mid-Term Exams</b>		<input checked="" type="checkbox"/> <b>Quizzes</b>		<input checked="" type="checkbox"/> <b>Assignments</b>
	<input checked="" type="checkbox"/> <b>Final Exam</b>		<input checked="" type="checkbox"/> <b>Project</b>		<input type="checkbox"/> <b>Lab Work</b>
<b>Text Book:</b>	Blank, R., Burau, V., & Kuhlmann, E. (Eds.). (2017). <i>Comparative health policy</i> (5th ed.). Palgrave. ISBN: 9781137544957

**Healthcare Insurance (HCM 563)**

College	Health Sciences		Department	Public Health
Course Name	Healthcare Insurance	Course Code:	HCM563	
Credit Hours	3 credit Hours	Contact Hours	3 hours	
Teaching Language	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
Course Level	Level 2	Prerequisite	None	

**Course Description:**

It was designed to focus on general insurance concepts and particularly health insurance in addition to health cooperative guaranty programs which are applied in the kingdom. The course will focus on how to use health insurance to reduce the adverse financial impact in case of a loss has become an important element of financial and risk management in our society

**Course learning outcomes:**

1. Describe the usage of diagnostic medical coding for global classification of insurance to avoid fraud and abuse in the healthcare practice.
2. Define the basic concepts of health insurance and its usage, types of coverage, and terminology of the health insurance industry in Saudi Arabia , health insurance systems globally.
3. Appraise the process of the risk selection and risk adjustment in Health Insurance practices.
4. Analyze the potential of health and preventative measures and the future of health insurance in Saudi Arabia based on the Cooperative Health Insurance System directive issued by the Council of Ministers and Saudi Vision 2030
5. Evaluate the processes of billing, claims, reimbursement in financial impact of health insurance in the Saudi Arabia .

**Major Topics :**

1. Introduction to the Emergence of Insurance
2. Basic Concepts, Usage, Criteria, and Terminology of Insurance
3. Providing Universal Health Coverage
4. Contracts and Networks in Saudi Arabia
5. Benefits of Health Insurance
6. Processing Healthcare Claims in Saudi Arabia
7. Reimbursement of Claims
8. Funding Health Insurance
9. Managed Care
10. Underwriting, Risk Selection, and Risk Adjustment
11. Saudi Arabia's Legal Requirements for Employers

12. Coding Basics					
13. Insurance Fraud and Abuse Globally and in Saudi Arabia					
14. Future of Health Insurance in Saudi Arabia

### Healthcare Finance (HCM 565)

<b>College</b>	Health Sciences		<b>Department</b>	Public Health										
<b>Course Name</b>	Healthcare Finance	<b>Course Code:</b>	HCM 565											
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours											
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English											
<b>Course Level</b>	Level 3	<b>Prerequisite</b>	None											
<b>Course Description:</b> This course focuses on the application of key finance principles and concepts to healthcare organizations. The course enables students to learn how to develop, apply, and interpret various financial tools and concepts including financial statements analysis, costs structure and allocation, dashboards, budgeting and variance analysis, sources of revenue and reimbursement, return on investment analysis, financial ratios, capital budgeting and investment decision making, and working capital management.														
<b>Course learning outcomes:</b> 1. Describe functions of financial management, roles, responsibilities of finance managers in Saudi Arabian healthcare organizations, financial forecasting and strategic financial planning for effective decision making. 2. Define the concepts of time value money, revenue cycle, reimbursement, costs structures, cost allocation methods, used by Saudi Arabia's healthcare organizations to ensure effective control, operation sustainability, and organizational efficiency and effectiveness. 3. Interpret the staffing methods and regulations to find out the direct and indirect costs associated with turnover for a better staffing forecast. 4. Analyze the financial statements, working capital management, break-even analysis, capital budgeting and investment for long-term financing decisions and options, other critical financial plans needed to ensure the organization's financial viability in the long-term. 5. Evaluate spreadsheets and financial reports used for monitoring, control, reporting, and oversight in the application of basic financial management values.

### Healthcare Information Systems (HCM 570)

College	Health Sciences		Department	Public Health										
Course Name	Healthcare Information Systems	Course Code:	HCM 570											
Credit Hours	3 credit Hours	Contact Hours	3 hours											
Teaching Language		<input type="checkbox"/> Arabic	<input checked="" type="checkbox"/> English											
Course Level	Level 4	Prerequisite	HCM 500											
<b>Course Description:</b> This course is designed to introduce students to the core knowledge and skills needed to oversee information technology in a healthcare environment. This includes how to identify and solve organizational problems affecting the design, implementation, and use of health information management systems throughout the enterprise. In this course, you will gain knowledge on how healthcare administrators can lead, manage, develop, and motivate staff toward meeting changing needs. We'll discuss the functions and interoperability of various systems including regulatory requirements, and how to assure the confidentiality of patient information and recent trends in the changing healthcare landscape.														
<b>Course learning outcomes:</b> 1. Define the role, responsibilities, and challenges of leadership in healthcare information systems objectives, planning, and implementation. 2. Use software applications designed for healthcare personnel management, electronic medical records, automated patient scheduling, automated prescription generation, and other healthcare clinical functions. 3. Compare an information system, a healthcare information system and a departmental information system. 4. Evaluate the importance of system interoperability and standards based approaches.														
<b>Major Course Topics:</b> <table><tr><td>1. The Health Information Technology Landscape and the Kingdom of Saudi Arabia</td></tr><tr><td>2. **Public Health (HCM 574)**

College	Health Sciences		Department	Public Health
Course Name	Public Health	Course Code:	HCM 574	
Credit Hours	3 credit Hours	Contact Hours	3 hours	
Teaching Language		<input type="checkbox"/> Arabic	<input checked="" type="checkbox"/> English	
Course Level	Level 2	Prerequisite	None	
<b>Course Description:</b> This course introduces the concepts of public health from the context of population health management. Students learn what public health is, and how it works with a focus on populations and strategies that can be applied towards preventing disease and promoting health. The historical background of public health is considered including a review of tools used to assess the health status of communities including epidemiology and vital statistics. Etiology and control of infectious disease are also examined.				
<b>Course learning outcomes:</b> <div><div></div><div><div>1. Describe philosophy, history and different concepts of public health.</div><div>2. Recognize the role of epidemiology and determinants of health in prevention and control of disease.</div><div>3. Analyze standardized measurements of population health status and the use of technology for surveillance.</div><div>4. Assess measurements of public health performance which used in evaluating the quality of healthcare</div><div>5. Evaluate the tools needed to manage the public health practices and public health departments effectively.</div></div></div>				
<b>Major Course Topics:</b> <div><div></div><div><div>1. The History of Public Health</div><div>2. Population Health and Public Data</div><div>3. The Need for Public Health Infrastructure</div><div>4. Organization of Public Health Systems</div><div>5. Public Health in Saudi Arabia</div><div>6. Epidemiology</div><div>7. ## **HCM 599 -Field Experience (internship, cooperative program)**

**a. Brief description :**

The students will undergo training across various healthcare organizations and related fields. The training can range from healthcare operations, quality control and assurance to patient safety management etc. The student are required to give a presentation at the end of their training and present their project research thesis.

**b. Time allocation and scheduling arrangement :**

8 weeks, Level 4

**c. Number of credit hours :**

NO

**d. Intended learning outcomes :**

i) To train students in all fields of health care and to equip them with knowledge required to maintain and develop their professional skills.

ii) To correlate theoretical knowledge with practical exposure in order to ensure their expertise in the field of healthcare management and to give them hands-on research experience

**e. Assessment procedures :**

The training period Evaluation by special form grading satisfied at least

## **Research Project (HCM600)**

<b>College</b>	Health Sciences		<b>Department</b>	Public Health
<b>Course Name</b>	Research Project	<b>Course Code:</b>	HCM 600	
<b>Credit Hours</b>	3 credit Hours	<b>Contact Hours</b>	3 hours	
<b>Teaching Language</b>	<input type="checkbox"/> Arabic		<input checked="" type="checkbox"/> English	
<b>Course Level</b>	Level 4	<b>Prerequisite</b>	HCM 505	
<b>Course Description:</b> The purpose of this course is to make a research project under the supervision of a faculty member. The goal is to provide students with hands-on research experience through completing a research project starting with hypothesis development (if applicable), literature searching, experimental design, data collection, and analysis and interpretation. Then they will write up the research and its findings according to an established template.				
<b>Course learning outcomes:</b> <ol style="list-style-type: none"> <li>1. Describe nature and importance of the research process, concepts of research and its methodologies, appropriate research problem and its parameters, Differentiate between data collection methods and techniques Recognize the importance of research.</li> <li>2. Define different approaches of research for research proposal.</li> <li>3. Use a questionnaire and other data collection tools, analyze the collected data using statistical programs as SPSS</li> <li>4. Analyze scientific research effectively, critical thinking methods in solving scientific research problems following all ethical principles of research</li> <li>5. Evaluate research results responsibly, critically and objectively.</li> </ol>				
<b>Major Course Topics:</b> Student will choose a topic from healthcare field. Find out the gaps in that area and how to fulfil those gaps.				
<b>Grading:</b>	<input checked="" type="checkbox"/> Mid-Term Exams		<input checked="" type="checkbox"/> Quizzes	<input checked="" type="checkbox"/> Assignments
	<input checked="" type="checkbox"/> Final Exam		<input checked="" type="checkbox"/> Project	<input type="checkbox"/> Lab Work
